

Car Watch

Helping you help your car.

Maintaining your car makes it safer for you and your family.

Here at Chevron, we want to help you keep your car in good working order, so that it's safer for you and your family. By giving you some ideas and helpful hints on what to look out for (OIL CHECK on the right) we feel we're sharing some of our knowledge and making sure that you're able to enjoy more trouble-free miles on the road. By taking some preventative action, you can also keep down the cost of running your vehicle.

YOUR FEEDBACK KEEPS US GOING

In striving to provide our clients with the best possible service, we love hearing from you and finding out what you think we can do to improve our service to you.

Don't be shy, let us know what you really think. We can't promise that we'll implement every idea, but we'll certainly do what we can.

If you think we're wonderful and can't improve, tell your friends about us and where they can enjoy the same level of care and service that you've enjoyed. We look forward to helping them too.

In the meantime, have many safe, enjoyable miles of driving.

I. OIL CHECK

Checking your oil levels is one of the quickest and simplest ways to ensure your vehicle is running smoothly.

One of the most important functions oil performs, is ensuring that the various metal surfaces don't grind against each other creating friction and resulting in parts deteriorating.

Oil also reduces the exposure to oxygen and thus oxidation at high temperatures.

Having too much oil is also not good and having oil leak onto the engine can have some disastrous results.

We strongly recommend that you bring it in to us o make sure that it's done properly.
