

Car Watch

Helping you help your car.

Maintaining your car makes it safer for you and your family.

Here at Chevron, we want to help you keep your car in good working order, so that it's safer for you and your family. By giving you some ideas and helpful hints on what to look out for (Condition of Tyres on the right) we feel we're sharing some of our knowledge and making sure that you're able to enjoy more trouble-free miles on the road. By taking some preventative action, you can also keep down the cost of running your vehicle.

YOUR FEEDBACK KEEPS US GOING

In striving to provide our clients with the best possible service, we love hearing from you and finding out what you think we can do to improve our service to you.

Don't be shy, let us know what you really think. We can't promise that we'll implement every idea, but we'll certainly do what we can.

If you think we're wonderful and can't improve, tell your friends about us and where they can enjoy the same level of care and service that you've enjoyed. We look forward to helping them too.

In the meantime, have many safe, enjoyable miles of driving.

3. Condition of Tyres

The condition of your tyres are vital to how your car grips the road, so it follows that it will affect the control and stability of the vehicle too.

In wet conditions the tread on the tyres disperse water away from the tyres' area of contact with the road, providing grip and stability.

Without sufficient tread, you could lose control of the vehicle and in extreme cases, the car can aquaplane, sliding across the water.

Most tyres have a marker on the tyres to indicate when the tyre is too worn.

To be absolutely sure and keep safe simply bring your car in to us and we'll check them for you.
