

# Car Watch

## Helping you help your car.

*Maintaining your car makes it safer for you and your family.*

Here at Chevron, we want to help you keep your car in good working order, so that it's safer for you and your family. By giving you some ideas and helpful hints on what to look out for (Tools and Spare Tyre on the right) we feel we're sharing some of our knowledge and making sure that you're able to enjoy more trouble-free miles on the road. By taking some preventative action, you can also keep down the cost of running your vehicle.

### YOUR FEEDBACK KEEPS US GOING

In striving to provide our clients with the best possible service, we love hearing from you and finding out what you think we can do to improve our service to you.

Don't be shy, let us know what you really think. We can't promise that we'll implement every idea, but we'll certainly do what we can.

If you think we're wonderful and can't improve, tell your friends about us and where they can enjoy the same level of care and service that you've enjoyed. We look forward to helping them too.

In the meantime, have many safe, enjoyable miles of driving.

### 4. Tools and Spare Tyre

In the unlikely event that you get a flat tyre, you'd want to be sure that you don't get stranded in the middle of nowhere hoping another car might stop to help you, when you can easily change the tyre yourself and be on your way in no time.

We recommend that you check to make sure your Spare Tyre is in good working order and that all the necessary tools are where they should be (usually in the boot under the mat).

You wouldn't want to find out they're not there when you really need them.

You can also check out our website for tips on the best way to change your tyre. Or just bring it in to us and we'll check for you.
