

Car Watch

Helping you help your car.

Maintaining your car makes it safer for you and your family.

Here at Chevron, we want to help you keep your car in good working order, so that it's safer for you and your family. By giving you some ideas and helpful hints on what to look out for (Cooling system/water level) we feel we're sharing some of our knowledge and making sure that you're able to enjoy more trouble-free miles on the road. By taking some preventative action, you can also keep down the cost of running your vehicle.

YOUR FEEDBACK KEEPS US GOING

In striving to provide our clients with the best possible service, we love hearing from you and finding out what you think we can do to improve our service to you.

Don't be shy, let us know what you really think. We can't promise that we'll implement every idea, but we'll certainly do what we can.

If you think we're wonderful and can't improve, tell your friends about us and where they can enjoy the same level of care and service that you've enjoyed. We look forward to helping them too.

In the meantime, have many safe, enjoyable miles of driving.

5. Cooling System/ Water Level

Most of the energy produced by the engine in the process of converting fuel into power, is heat. The cooling system needs to be working efficiently to keep your car from overheating.

Low coolant levels means that there won't be enough water to keep the engine cool. If levels are low, it may also mean that there is a crack or leak in the pipes, so simply topping it up with more water wouldn't solve the problem.

Ensure that your car is checked regularly so that you're not left standing on the side of the road with smoke billowing out the bonnet. You can also check out our website for tips on the best way to change your tyre. Or just bring it in to us and we'll check for you.
